Clinical Veterinarian, University Research Animal Resources. The University of Georgia animal care and use program is on the move. We are looking for a great veterinarian to join us in our growing AAALAC-accredited program. Specifically, we are seeking applications and nominations to engage a full-time clinical veterinarian for University Research Animal Resources (URAR) to support a new Nonhuman Primate Core Facility. UGA URAR supports a broad variety of activities using diverse species; provides facilities which include a large ABSL3/BSL3-Ag facility, rodent barrier/containment, rabbit, amphibian, aquaculture, agricultural and primate areas; and promotes continuous development of a high-quality, service-oriented research resource that provides optimal animal care. In the near future we will be adding a new nonhuman primate core facility and a small gnotobiotic facility.

Reporting directly to the Director of University Research Animal Resources, the duties will focus on supporting the Nonhuman Primate Core Facility, and will include providing veterinary care; performing diagnostic and research-related procedures, serving as an alternate member of the IACUC; participating in training investigators, research staff, and URAR professionals; assuring compliance with applicable policy, guidelines, and laws; consulting with faculty on the development of research projects; and mentoring and instructing veterinary externs and residents as part of an emerging academic comparative medicine program based in the College of Veterinary Medicine.

Candidates with residency training and ACLAM certification or eligibility to sit for the exam are preferred, and previous experience working with macaques is required. Applicants must possess a DVM or equivalent degree from an accredited college of veterinary medicine and a license to practice veterinary medicine in the United States. The ability to communicate clearly and concisely with colleagues, supervised URAR professionals, and other stakeholders is critical. This is a full time, non-tenure track staff position. Additional professional development through collaboration and ACLAM board certification are strongly encouraged and supported.

Applicants must apply on the UGA HR website at [https://www.ugajobsearch.com](https://www.ugajobsearch.com). A letter of application along with a curriculum vitae and the names, addresses, phone numbers, and e-mail addresses of three professional references should be sent to Heather Stoltz, University Research Animal Resources, 501 D.W. Brooks Drive, Rm H383, The University of Georgia, Athens, GA 30602-7411. For additional information about the position and program please contact Dr. Lois Zitzow at 706-542-4173 or at lzitzow@uga.edu.<mailto:lzitzow@uga.edu>

The UGA is a research-intensive land grant/sea grant university situated in the vibrant college town of Athens. Only an hour from Atlanta, Athens offers a wide variety of social and cultural opportunities as well as a high-quality of life. The University of Georgia is an affirmative action/equal opportunity employer.
